Subj: NRO Budget Justifications - Expanded Collection
LFJ/SMB

1. Why do we have to justify the NRO Budget with increased or expanded collection requirements when we are not getting our current requirements satisfied?
2. Narcotics - We agree that collection can and should be expanded. However, before collection is expanded we must ensure that a commitment is made to provide the necessary exploitation resources.
3. International Terrorism - Comprehensive effort to locate, identify and monitor base areas. This is more of an exploitation problem with some expanded collection as study develops. Again exploitation resources will be required. Some of this work is being done on a piecemeal effort.

4. EFFECTS of Petrodollars on Improving
standard of living in OPEC countries.

- Comprehensive study on improved or
increased availability of housing, schools,
electrification, water/sewage treatment, etc.
This also requires an exploitation
resource commitment with some
expansion of the collection effort.

SUGGESTED AREAS FOR EXPANSION OF COLLECTION

"CIVILIAN APPLICATIONS - DENIED AREAS"

Photo -- EXTENT OF DROUGHT AFFECTED AREAS CONCURRENT
TO AVAILABLE STORED WATER.

-- EXTENT OF AREAS AFFECTED BY NATURAL
DISASTERS i.e., earthquakes, cyclones, typhoons.

-- CONVERSION OF INDUSTRY TO ALTERNATIVE
FUELS

-- DISPERSAL OF INDUSTRY FROM TRADITIONAL
URBAN AREAS TO RURAL SETTINGS.

-- Now's the time to get coverage of Third World &
Industrial Nations - South Africa, Saudi Arabia,
Iran, etc. - and develop an industrial data
base system. For example, CSIS project on
S. Africa flourine production starting at
virtually zero as to what plants to analyze.

If we are able to expand "collection" will
we have ^{or get} the resources to exploit it?
